Why is it that some of our people here pay 25c net for gas and others pay as low as 15c net. Is it true that at other points where natural gas is used a rate has been proposed even less than 15c? If the reports we hear are true, discrimination is being practiced.

DISSENTING.

It is a shame the way these 'colleges' waste money on furniture, said a well-known farmer as he threw down a paper he was reading over in the court room the other day. Here's an account of some fellow giving Howard College \$25,000 for a new chair—Ex.

And there are others, not farmers, just as ignorant, folks who ought to, but don't know.

A NEED.

Some how or other we think the C. & O. would rock the driveways about the freight depot and switches where freight is received and delivered, if our people would select a spokesman to call the company's attention to the conditions there. Some places are almost impassable. The city authorities might call the attention of the officials to this. Their driveways need to be rocked.

ORATORICAL CONTEST.

The intercollegiate oratorical contest will be held this year in Morrison chapel at Kentucky University on the evening of April 26. Five colleges will be represented, Kentucky State College, Kentucky University, Georgetown College, Central University and Kentucky Wesleyan College. A beautiful gold medal will be awarded to the successful orator. With the exception of the athletic contests between the colleges of Central Kentucky, the annual oratorical contest has proven the greatest event in college circles.

The oratorical contests are improvements on base ball, the brutal method of playing foot ball and several other things, the practice of which our so-called colleges are guilty. When these schools resume some of the former methods of work, the thrift of our boys will be developed and we will soon learn of an increase of great men.

NEW FRANCHISE FOR LOCAL PHONE.

We have information that the City Council is considering the granting of a new franchise to the local telephone company. We are also informed the company's present franchise will not expire until August, 1908. If these reports be correct, believing in the forethought that the city should not tie her hands against the advantages of any improvements that may come, we do not, with what information we have in hand, see any reason why another franchise should be granted during the life of the present one. We are living in an age of inventions and it may be some attachment may be invented by which our present system may be greatly improved and to the ourselves now, hand and foot, we may be deprived of such improvements. Our people deserve the very best, they pay for it and should have it. This matter, however, has been assigned to Councilmen Bourne, Wade and Sullivan and we feel sure in them the city's interests will be safely guarded and that no hardship will be allotted to the phone company. We are anxious that liberties be given to the phone company, that they be encouraged to give us at all times, now and in the future, the very best service an up-to-date plant can produce, and that for their services the company may be enabled to realize a fair remuneration, that the operators and other employees may be paid according to their value and that all laborers be competent to discharge their duties to the satisfaction of the company and patrons as well.

This is a very serious matter and we cannot be too cautious in our decisions and acts.

WHAT NEXT?

Special Judge Carnes in the Hargis case, took the prosecution and defense by surprise when they failing to agree, he sent the Hargis case to the county of Elliott. The prosecution at once withdrew his motion for a change of venue, claiming this rendered null and void Judge Carnes' order. The order was sustained, the case went to Elliott and the presiding judge of that district, M. M. Redwine, refusing to sit in judgment on the case going and the "I tell you so," are actively talking. From then those to whom duty has been assigned may learn wisdom. With this action of Judge Redwine closes another chapter, and with abated breath the public eagerly await to know the outline of future proceedings.

Republicans want Bradley for U. S. Senator and Yerkes for Governor.

COMPARISON OF INS AND OUTS.

The streets of Mt. Sterling are in a deplorable condition. They were awful under the former administration and it seems to us are equally as bad or worse, and that after pledges had been made that they would be improved. Taxpayers, you can draw the comparison.

The present administration in their appendix to statement confess that the rock they are now using is no better than the former stone and intimate the only way to get away from it is by the use of wood, brick or asphalt. Will the city adopt either, and if so, when? or will the citizens who pay the tax limit be forced to continue to wade in mud almost shoe-top deep? If there is a remedy why not inaugurate it now, or if there are no preliminaries why not get ready? A suggestion, an intimation or promise, inactive, only arouses anticipation.

We are told we are to have a public building. What steps have been taken to secure it, any? It was only a little while back that Congressman Hopkins appended to the Council through representative citizens asking that help come from this end of the line. The City Council was appealed to by Judge H. Clay McKee, only asking that a committee be appointed to assist him in taking the census of Mt. Sterling, with the pledge it should be without cost to the city. The committee was not appointed and Mt. Sterling Council has no promise that an appropriation will be made during the life of its administration. The old council did not do anything along these lines, and the people, growing tired of them, turned them out. We have an inkling that what was done for the former council may be done to the present one unless they should bring things worth while to pass. History repeats itself.

Reduction of salaries? When? If it is for the best interests of the city that salaries should be reduced in 1908, why in the name of economy and wisdom was it not for the common good to have the reduction take place January 1, 1907, when the present administration assumed control of city affairs? Had that been done the disbursements would have been less and the debts could have been reduced the more.

Free mail delivery. The present City Council can have a part in this by making an appropriation for numbering houses, naming streets, etc. Will they do it? We shall see.

What this council has not done the former did not do. It was

what the boy used to call a "dog fall."

Along the matter of forcing the saloons to close the present council has done well with some of the saloons. Some saloons here have tried to obey the laws and needed little watching, if any. The minor ordinance was a misfit. To get it cost the city time and much thought and a draw on the treasury for publisher's cost, but when tested it was found it could not be enforced and to all appearances is a defunct production.

Street Car Employees Out on a Strike at Louisville.

Organized labor makes demands which, being refused, went out on a strike. The Railway Company refuse to dismiss employees who would not join the union—they insist on conducting their own business, rather than turn it over to the organization. They refuse to arbitrate these demands. For these reasons and more the entire union force of the Railway Companies are out of employment and their families suffer for want of a full dinner pail. Organized labor has its rights as prescribed by the law and likewise organized capital—this and nothing more. A trespass on the rights of investment, destruction of property and injury to life has recourse at law and the corporation levying and collecting taxes, can be held responsible for any damage done. "Uncle Sam" has taken a hand and ordered off all cars marked U. S. and carrying the mails. To this command the manager of strikes assures obedience.

OPENING

—OF—

Ladies' Ready-to-Wear Suits and Skirts

Friday and Saturday
March 15 & 16
1907

we will have our opening of Suits and Skirts. We have with us these two days an expert from the city and show and fit these goods. Ilect your

Easter Dress

or Skirt at this opening and there are any changes to have, same can be done at returned here in time day on Easter Sunday.

Every Suit

and Skirt will be new; free from the factory, where "d" tinction in dress" is a fact and not a mere catch phrase. The designs will be exceptionally attractive and absolutely correct to the minute detail.

The range of fabrics in suits will give every opportunity of making selection easy. All the newest materials will be here, including Panama and Worsteds, stripes, plaids and plain fashionable colors.

IN SKIRTS

new models in chiffon, Panama, French voiles, fancy natures in stripes, plaids and checks. This

Opening

will set the town talking. Don't miss it. All new things in waists now on display our store.

 Mt. Sterling, Ky.

GRAPES GROWN UNDER GLASS.

The grape of grapes for the table is grown in Belgium—and under glass. It is in no American rustic spot that this ideal culture flourishes, but in the wide awake metropolitan suburb of Hoeclart, near Brussels. Here there is a whole region of glass—nothing but glass over a wide vista. The spectacle is one of the shows of the country for amateurs and sightseers alike.

A good many lovers of table fruit those interested in the subject extend no farther than the doctest stand. It probably be surprised to learn that it is from no native hothouse, but from Hoeclart, that the great fruiters of London, Paris, the Biviers, Vienna, Berlin, St. Petersburg, and, mirabile dictu, even New York, receive the bulk of their winter supplies. Every Friday hundreds of chests of choice fruit, admirably packed, are dispatched to the United States alone. The price at Hoeclart is a minimum of 15 pence a pound on the vine, with five pence added for packing. The choicest bunches are those that weigh about two pounds.

ACCOMMODATION.

"I was asked to find out who would collect this little account," said the collector, phlegmatically. "Really," answered the debtor, "I am unable to enlighten you. However, there is a schoolmaster in the next block who throws a fit and reveals the future at 50 cents a throw."

"I've no money to waste," growled the collector.

"I just add the 50 cents to my account," continued the other, "for I have curiosity on the point myself."

EXPENSIVE REPAIRS.

After being injured by a bull of average temper, a farmer was under a doctor's care for a considerable time, and thereby incurred a heavy bill for medical attendance.

When he was almost well one of his old friends who had called upon him and congratulated him on his recovery, as well after such a long illness.

"Looking well," echoed the farmer. "I should be looking well, here's been nearly \$100 spent in repairs on me lately, and I'm not mislead yet!"

Williams' Carbolic Salve With Arnica and Witch Hazel.

The best Salve in the world for cuts, bruises, burns, scalds, frost-bites, chapped hands, and all skin eruptions. It is an antiseptic and a powerful healer. Price by druggists. Sold by T. J. Kennedy, 30-31.

ARCTIC OWL STALKED PIGEONS.

Boatmen Watched a Combat on the Old South Church Roof.

An enormous specimen of the genus *Bonaparte*, with a spread of wings of nearly five feet, industriously stalked pigeons on the roof of the Old South church recently, says the Boston Post.

Like the raven made immortal by Edgar Allan Poe, the great gray owl was probably brought to town by a storm, drifting along in the snow and wind for thousands of miles from the frozen north.

Ex-Cashier F. A. Low of the Suffolk bank was the first to spy the owl. He was seated in room 538, Old South building, when a shadow suddenly darkened the window and the scores of pigeons which have transformed the Old South ridge-pole into a feathered lovers' lane, set up a frightened cooing and flitted away.

"Look quick, fellows!" called the startled banker. "Here's an airship sailing by."

But further investigation transformed the airship. For over an hour the owl remained perched upon one of the chimneys, making a dart now and then for some unwary pigeon, then was driven away by a bombardment of dusts, inkstands, old rubbers, etc., propelled by iron boys in the upper stories of the Old South building.

One of the scientists in the Boston Society of Natural History building on Boylston street declared that while there are small gray owls who live in this latitude and longitude, it is a rare occurrence when such a large specimen is seen in this part of the country. He declared it was undoubtedly an arctic owl driven by some storm thousands of miles from its home.

When the bird left the vicinity of the Old South church it proceeded toward the harbor in express train speed and was seen no more.

SOOTHING.

Mr. Moneybags— "What? More money? You have no idea of the value or security of money. Young man, I work for my—"
 Willie Moneybags—"There, there, ease, even at that you don't earn your money like I do."

WHAT WAS WRONG WITH HIM.

A Richmond man has in his employ a colored man of advanced age who, by reason of his thrifty habits, had accumulated enough money to defray the cost of his son's tuition at a negro college in Alabama.

When the darky's boy returned to Richmond after the completion of his course he provided, much to his parent's disgust, to air his opinion on various subjects in a more or less diffuse style of speech.

One day the old man took him aside and addressed him as follows:

"Richard Thompson Jenkins, I've been listenin' to yo' fo' several days, an' it's my opinion dat yo' talk an' talk. Yo' don't reach into de stomach of yo' subdock; but yo' jes' argufy an' argufy. Yo' don't be- come, Richard Thompson Jenkins, yo' don't 'locate!' — Harper's Weekly.

DOWN ON THE FARM.

Silas Crawford—What has become of your husband, Mrs. Harbapple?

Mrs. Harbapple—Why, Hiram has locked himself in the garret and won't be disturbed. He is reading something of the greatest importance.

Silas Crawford—Do tell! President's messages or war rumors?

Mrs. Harbapple—Somethin' more important than that. He's reading his new farmer's almanac from the signs of the zodiac on the first page to the ass'prilla ad on the last page.

BEING HONEST ABOUT IT.

Mother—You say you are really going to marry Mr. Wynner.

Daughter—Yes.

Mother—Why, you said last week that you wouldn't marry him if he were the last man on earth.

Daughter—I know I did. But I thought then that he wasn't going to propose.

In Memory of ———

Their meeting it was sudden,
 Their meeting it was sad,
 She saw her dear young life,
 'Twas all the life she had,
 She sleeps beneath the pale blue fair,
 In peace she's resting now,
 Oh, there's always something doing
 When a freight train screeches a cow.
 —Curtis Labaree.

If you spend your time in growling about an imaginary wrong, you are apt to neglect your own shortcomings.

Don't use harsh physics. The reaction weakens the bowels, leads to chronic constipation. Get Doan's Regulators. They operate easily, tone the stomach, cure constipation. 34-41

Senator Forsaker is still attempting to prove that the white people of Brownsville shot up their own town and killed and wounded their own citizens just to spite the negroes.

Richard Watson Gilder says he is convinced that the white people are happier. We thought so, too, until we heard some of the remarks of our neighbors who had to shovel snow off the walk.

FINE FLOWERS OF LONG AGO.

English Florists Had Secret of Growing Immense Carnations.

An Olive street florist says that we pride ourselves nowadays on the size of our carnations, but the florists of 300 years ago grew carnations three to four inches across, as large as any that we see, and thought nothing of it.

"All through Spain, southern France and Italy, the carnation is the favorite flower and has been for hundreds of years, but along the Mediterranean there are few glass houses, for in protected situations and on southern slopes of hills even delicate flowers grow outdoors all winter long and bloom as freely at Christmas as in July.

"The big carnations, however, were not grown in Spain or Italy, but in England, outdoors, during the summer time and before glass houses were known. They may have grown just as large carnation flowers in Spain as in England at that time, but in England there was record made of the fact and also of the size, while in Spain there was not. Shakespeare mentions carnations and gilly flowers, or July flowers, together as blooming at the same season, which shows that the carnation was then a summer flower, whereas in our greenhouses it is now a winter bloomer. The carnation of Shakespeare's day must have had very short stems, for they grew out of doors. How the florists of those days wanted the plants to obtain blooms of such size nobody knew, for old-time florists grew flowers instead of writing books about them; so all we know is that they had very large carnations in Queen Elizabeth's time, without knowing how they were grown."—St. Louis Globe-Democrat.

SEEMED OUT OF PLACE.

The top hat represents the universal language of attire. It wails and weeps against the walls of Jerusalem, and it turns up in the altitudes of the desert; even the cloudiest mountain peaks are not safe from its democratic simplicity. Once I met a silk hat, probably rescued from some benevolent dust bin, milking a cow in a London park. The hat nearly caused a riot, and every passerby turned and stared indignantly. The eccentric cowboy in the top hat finished his allotted task, and in company of his cow and the milk pail he ambled placidly out of sight. Still, one can't help asking, in the interest of personal liberty, why shouldn't a silk hat be permitted to milk a cow? The cow doesn't mind, so why should we?—Fortnightly Review.

MAKES HONEST CONFESSION.

An amusing story is related of John Hopkins. Honesty was evidently one of the fundamental traits of his character. On one occasion he was sent by his mother to borrow a flat iron of a neighbor. The good neighbor gave him the flat iron and at the same time offered him a piece of pie.

"No, thank you. I don't want any," said the red faced boy, as he started home. Half way there the pie and his conscience were too much for him. He wheeled about and knocked again at the neighbor's door, his face redder than ever. "I told you a story," he explained; "I did want that pie."—Exchange.

A PROOF.

Hewitt—You are getting pretty absent-minded.
 Jewett—That's so; I smoked too cigar you gave me the other day.

SMART.

"That plump little Widow Filberts, who is just going by, is quite an accomplished woman, isn't she?" inquired the picture enlarger, who was fairly well acquainted in the hamlet.

"You betcha!" triumphantly replied the landlady of the tavern at Polkville, Ark. She's caused four men to be shot, within the past two years—smart a woman as there is in town! Be an ornament to the Four Hundred of New York, I reckon."—Puck.

ARCTIC OWL STALKED PIGEONS.

Eastonians Watched a Combat on the Old South Church Roof.

An enormous specimen of the genus *Bombus*, with a spread of wings of nearly five feet, industriously stalked pigeons on the roof of the Old South church recently, says the Boston Post.

Like the raven made immortal by Edgar Allan Poe, the great gray owl was probably brought to town by a storm, drifting along in the snow and wind for thousands of miles from the frozen north.

Ensign F. A. Low of the Suffolk bank was the first to spy the owl. He was seated in room 508, Old South building, when a shadow suddenly darkened the window and the scores of pigeons which have transformed the Old South ridge-pole into a feathered lovers' lane, set up a frightened cooing and flitted away.

"Look quick, fellows!" called the startled banker. "Here's an airship sailing by."

But further investigation transformed the airship. For over an hour the owl remained perched upon one of the chimneys, making a dart now and then for some unwary pigeon, then was driven away by a bombardment of dusters, inkstands, old rubbers, etc., propelled by office boys in the upper stories of the Old South building.

One of the scientists in the Boston Society of Natural History building on Boylston street declared that while there are small gray owls who live in this latitude and longitude, it is a rare occurrence when such a large specimen is seen in this part of the country. He declared it was undoubtedly an arctic owl driven by some storm thousands of miles from its home.

When the bird left the vicinity of the Old South church it proceeded toward the harbor at express train speed and was seen no more.

SOOTHING.

Mumnygrub—What? More money? You have no idea of the price of money. Young man, I work for my money.

Willie Mumnygrub—There, there, even at that you don't earn your money like I do.

WHAT WAS WRONG WITH HIM.

A Beaufort man has in his own person a colored man of advanced age, by reason of his thrifty habits. He accumulated enough money to defray the cost of his son's tuition at a negro college in Alabama.

When the darky's boy returned to Beaufort after the completion of his course he proceeded, much to his father's disgust, to air his opinion on various subjects in a more or less stilted style of speech.

One day the old man took him aside and addressed him as follows:

"Richard Thompson Jenkins, I've been listenin' to yo' fo' several days, an' it's my opinion dat yo' talk an' talk. Yo' don't reach into de stomach of yo' subject; but yo' jes' argue an' argue. Yo' don't know, Richard Thompson Jenkins, yo' don't locate."—Harper's Weekly.

DOWN ON THE FARM.

Silas Crawford—What has become of your husband, Mrs. Hardapple?

Mrs. Hardapple—Why, Hiram has locked himself in the garret and won't be disturbed. He is reading something of the greatest importance.

Silas Crawford—Do tell! President's messages or war rumors?

Mrs. Hardapple—Somechin' more important than that. He's reading his new farmer's almanac from the signs of the zodiac on the first page to the stars' prilla ad on the last page.

BEING HONEST ABOUT IT.

Mother—You say you are really going to marry Mr. Wynner.

Daughter—Yes.

Mother—Why, you said last week that you wouldn't marry him if he were the last man on earth.

Daughter—I know I did. But I thought then that he wasn't going to propose.

In Memory of -----

Their meeting it was sudden,
Their meeting it was sad,
She carried her own young life,
Two-alls the life she had.
She sleeps beneath the distant fair,
In peace she's resting now,
Oh, there's always something doing
When a freight train crosses a row.
—Gordon Labaree.

FLUE CURING IMPROVES TOBACCO LIKE ROASTING IMPROVES GREEN COFFEE

Flue Curing Develops the Stimulating Aroma and Taste Found in Schnapps that Satisfies Tobacco Hunger

There are three ways used by farmers for curing and preparing their tobacco for the market; namely, sun cured, air cured and flue cured. The old and cheap way is called air cured; the later discovery and improved way is called flue cured. In flue-curing the tobacco is taken from the field and suspended over intensely hot fires in houses especially built to retain the heat, and there kept in the proper temperature until this curing process develops in the tobacco the stimulating taste and fragrant aroma found in Schnapps tobacco, just as green coffee is made fragrant and stimulating by the roasting process. Only choice selections of this ripe, juicy flue cured leaf, grown in the famous Piedmont country, where the best tobacco grows, are used in Schnapps and other Reynolds' brands of high grade, flue cured tobaccos.

LOST COIN CHECKS TRAFFIC
Paths That Is a Part of Great City's
Daily Life.

She was a little old woman with
a coarse shawl wrapped around her
shoulders and a knitted headpiece
known as a mibia on her head.
Bending over, she peered about the
asphalt pavement in total disregard
of the dangers from passing traffic
on lower Broadway, says the New
York Press.

"Lost anything, lady?" asked a
policeman.

"Yes, sir," she answered, "some
money."

The bluecoat looked at her worn
old face for a moment and then he,
too, got busy. A newday joined in
the hunt. Presently several citi-
zens were participants. A street car
stopped, and then another. The
driver of a big truck pulled up at
the curb, clambered down and be-
came another searcher for the lost
coin. Several minutes passed.
There was a partial blockade of the
street, and then the policeman
picked up a dime from its resting
place on the street car track.

"Is this part of it?" he said.

"Yes, sir," answered the old wom-
an joyfully; it's all of it."

An evaluation arose to the po-
liceman's lips, a laugh ran among
the bystanders, but it stopped at the
glad look in the old woman's eyes as
she reached her gnarled hand for the
little coin. The policeman checked
the half formed utterance and so-
lemnly escorted the old woman to
the curb. The cops rattled on, the
big truck swung on its way and the
policeman stood silently at his post.
No one thought to joke, no one
thought to swear after that look of
joy that came into the old woman's
eyes as her lost coin was restored.
Broadway had been inconvenienced
as Broadway seldom likes to be, but
who shall say that Broadway is "the
cold white path without a heart"
after that exhibition?

EXTREMES MEET AGAIN.

Howler—Hallo, Triggs, it must be
years since I saw you! Great Scott!
How tall you are, now!

Scotty—Yes, I'm pretty tall, but curi-
ously I am always an "about" as
ever.

HE THOUGHT IT OVER.

The boaster was telling what a
walker he is.

"Why," he said, in his usual self-
forgetful way, "I'm good for any
distance. I could start right in at
this very moment and walk clear
round the earth."

"I'd like to see you try it," re-
minded the other man. "But take
my advice. When you do try it
don't attempt to walk more than
20,000 miles. That's far enough.
Think it over."

The boaster thought it over and
finally realized that if he started
round the earth and walked but
20,000 miles he would stop short at
a point about 3,000 miles from the
point where he started.

And he didn't like the other man
very well after that.

PRECISE.

The woman with thin lips and a
rascally voice stopped up before the
longingly indifferent ticket seller in
the railway station.

"Where do you want to go?" he
asked as his jeweled fingers rifled a
bundle of postcards.

"None of your business where I
want to go," she snipped. "Just
sell me a ticket to New York,
but bear it in mind that I'm going
there because I've got to; not be-
cause I want to."—Washington
Star.

FACTS AND OBSERVATIONS

Pineapple Industry, Fishing, Boat Riding, The Everglades, Negro Vote, Saloon License, Tourists.

(Continued From Last Week.)

WEST PALM BEACH.

Here we for the first time saw a coconut tree with ripe nuts. The bearing trees are from 20 feet up; the leaves are at top and the nuts grow in bunches. The town has wide streets, smooth and hard, affording fine facilities for bicycles and automobiles. The business houses and hotels are modern and attractive. The business and life of the town are dependent upon tourists. Territory for expansion is large. Mocking birds and black birds are the songsters. We were surprised to see so many buzzards. At one time we counted 20 on the roof of the great hotel Royal Poinciana. Pelicans and wild ducks were in the bay. No one is allowed to shoot the ducks, hence they are very gentle. At all times they could be seen near the ferry and piers.

We saw but little of the island. Pleasure trips in gasoline and naptha launches afford diversion. The bay extends 17 miles or more north of the hotel.

For seven weeks the ladies had pleasant quarters at "the Virginia" in West Palm Beach, kept by Mrs. A. L. Haugh, a genial Pennsylvania lady. Here we met many agreeable guests from a dozen different States.

TRIP TO MIAMI.

Miami is 66 miles south of West Palm Beach. We three spent Wednesday, February 27, there the guests of J. G. Trimble, Miss Ella Trimble was also with us. She boards at Rue Navista on Biscayne Bay with Mrs. Merritt, who was Miss Sallie Richardson, formerly of Mt. Sterling. Mr. Merritt is County Clerk. His home is two miles from Miami. The Royal Palm is the chief hotel. It is one of the Flagler group. While not so large as the Royal Poinciana it is on a grand style. The town is 10 years old and has about 6,000 people. The hotels Royal Palm and Haydon Hall are what the Seelbach is to Louisville. The Haydon is built of white stone. The town is strictly modern and is forging to the front. Large, fine business houses and wide streets are the rule. It is and will continue to be a commercial center. Steamship lines go to Bahama Islands, Cuba, etc. Miami is the county seat of Dade county. The length of the county is about 150 miles. The width (if we remember correctly) is about 40 miles, but with exception of a strip ranging from 1 to 3 miles wide along the coast, the everglades render this territory practically worthless. The population of Dade county is about 12,000. Outside of Palm Beach, West Palm Beach and Miami, all in Dade county, the population and business is practically nothing, except in isolated patches. This is the appearance from the railroad. On the train we talked with a man who referred to one settlement embracing 300 acres, in which the chief industry is the raising of tomatoes. He said the crop has been engaged for future delivery at \$2 per crate, and that an acre will produce about 300 crates. On this trip we saw several patches of pineapples. Later we will describe this industry.

Miami is headquarters for extensive fisheries. We saw sharks swimming to masts of the vessel, caught a few hours before. We met one of the tourists who caught them. He said the largest shark was 11 feet long and weighed about 500 lbs. Here we met W. J. Thomas and wife, of Shelbyville, Ky.; Mrs. T. N. Arnold and daughter, Mrs. Harry Groom, of Frankfort. Father Trimble owns 3 lots on same street and within one block of the great hotel Royal Palm. He can sell at an advance of 60 per cent. He bought 2 years ago.

MIAMI RIVER.

This river is 5 miles long. It flows from the Everglades into Biscayne Bay, past the Royal Palm. Excursion boats make the trip twice daily. The stream is from 8 to 15 feet deep and from 250 to 400 feet wide much of the way. It is a fine body of water. Three muscians added to the pleasure of the trip. Fine fish are in the river. Within a few yards of the head of the river where our boat stopped the stream is, we presume, 50 to 55 feet wide. En route several tributaries or ditches from the Everglades increase the size of the river. Much of the banks are a net work of a species of banyan tree, the limbs of which send down many smaller limbs, which take root and these in turn send out other limbs, etc. En route we stopped at a ten acre ranch where oranges and grape fruit abound. Most of these trees grow in holes blasted in the porous rock which is found near Miami. This ground can not be plowed because of the solid or scrappy rock. Much fertilizer is an essential. The fruit is profitable. At the head of navigation is an observatory overlooking the Everglades. This marsh land is fully 200 miles in length and extends west over most of the State. Here and there are small islands or grass and rushes as far as the eye could penetrate. Commercially this vast domain is worthless. Whether or not the skill of man will bring it into use remains to be seen. There is talk of a vast drainage system. Through the centuries there has no doubt been a gradual elevation from the gulf and its reclamation will be attributed to this process rather than to the engineering skill of man. Between the Everglades and the Atlantic Ocean is a strip of woodland of pines and palms, with interspersed jungle or live oak and long grey moss festooning.

The tourist, who for the first time visits Florida, will be amazed to see the vast regions of sand, pine forest, jungle, sterility, desolation or prairie of coarse grass. Thousands and thousands of acres are now wholly worthless, other thousands are susceptible of culture for pineapples—especially those of center of State, covering the strip for more than 200 miles and especially on what is called Indian River. You have heard of the noted oranges and pineapples of the Indian River section. We presume that many thousands and hundreds of thousands of people are so ignorant about Indian River as not to know that it is an inlet from or arm of the Atlantic, salt water connected at north and south with the Atlantic but separated on the east by a narrow strip of land, containing in places for forest, with now and then an opening to the sea. The rise and fall of ocean tide reaches far up or down this "river," which varies in width up to 15 miles (so we were told.) Much of the pineapple section is on Southern Indian River and beyond, towards West Palm Beach.

PIKEAPPLES.

Here pineapple farms or fields are similar to Burley Tobacco Co., or wheat fields in Central Kentucky. A pineapple plant is much

like the "needle and thread" known to our people, only the leaves are thick and heavy. These plants are usually set 20 by 22 inches and sell at about \$6 per thousand. They yield first crop when 18 months old and with good care produce well for 5 or 6 years. When full grown they nearly cover the ground by leaves lapping. Heavy fertilizing is required every year at an expense approximating \$65 per acre. We saw hundreds and hundreds of acres of "pines" as they are called. Each stalk produces only one apple at a time. We saw in the same field plants in bloom and plants with young apples as large as a pint cup. The crop ripens in June, yet apples can be brought to perfection later and earlier. As the train stopped we bought a fine fresh apple for 15 cents. We saw field after field of pineapples enclosed and covered by a lattice of wood, much like the covering occasionally used in an experimental tobacco patch or around a chicken coop. These ranches are side by side the apparently worthless sandy, piney land in the left where pineapples can be grown (Not all this Florida dry land is adapted to pineapples or oranges.) This wild land can be bought and cleared at about \$75 per acre usually, but clearing some of it is much more expensive. If the season is favorable and the market fair the returns from a crop range from \$200 to \$450 per acre. The above information about pineapples and Indian River was gotten from men on train and at stations in this territory.

We have not seen a corn or wheat or grass field (excepting a little of wild grass) in a run of about 400 miles through Florida north and south. "Not grass enough to summer a goose" has its fulfillment in Florida. We have not seen a goose or sheep, seldom even a razor back hog, only a few scrawny cattle. There may be many fine cows; we have seen one Jersey cow in the country. At Clerk's office in Miami we were informed that the licenses for a saloon amount to about \$1250 each, and that a strong sentiment is growing against saloons. Only 8 counties in the State tolerate them.

NEGRO VOTE.

In Florida the negro vote is practically eliminated. This is done by the law which imposes a poll tax of \$1 which must be paid before a man, white or black, is permitted to vote. Few negroes will pay it. Democrats control in Florida. Occasionally in a hot contest among themselves they use some negroes and whites by the payment of these poll taxes.

A BARBER.

At West Palm Beach we had a hair cut. The barber asked: Would you like to have your hair singed to prevent it bleeding? We do not. Will you have a tonie? No, I thank you—only a little bay-rum. We handed him a quarter. He presented a ticket for 35c extra. We paid it. The boy brushed our hair. As we left the proprietor surprised us by saying: "Are you not going to pay the boy for brushing your hair? That's all the pay he gets." We let him know that we were not accustomed to such and declined to pay. We presume every tourist is "held up" in the same fashion. The writer is rather green, but will know a thing or two before his next tour of Florida. We don't object to paying what is right, but will kick if "held up." We did not ask the proprietor what he charges for dusting a hat or what part the boy gets.

ITINERARY IN FLORIDA.

Saturday, February 23—En-

route to, at and from Jacksonville. Sunday—At St. Augustine, night enroute to West Palm Beach. Monday and Tuesday—At West Palm Beach, etc.

Wednesday—Trip to Miami. Thursday—Farewell at West Palm Beach and Palm Beach.

Friday—Enroute from West Palm Beach along Indian River to DeLand, 175 north and 34 miles west.

DELAND.

We arrived here on Friday at 5 p. m. after a 6-mile hack drive from Orange City, and will leave here today (Tuesday) March 5, for Orlando, St. Petersburg, Clear Water, etc.

DeLand is the county seat of Volusia county. The county is about 30 by 60 miles. The population of the town is, in summer, 2,000. In winter, a variable quantity, for the visitors in Florida towns sometimes exceed the resident population.

How shall a visitor put in the time? This is a question which any readers may ask. Some eat, sleep and play cards; some eat, sleep and play society; some eat, sleep and see sights in silent admiration, others are disposed to give a few pointers on Florida, its attractions, customs, resources, institutions, etc. We presume the readers will have some interest in our Facts and Observations. The bill of fare at the great hotels is extensive. Guests are not expected to take all on the list and call for more. All foods do not agree with all guests. So visit our observations, take what you like, without extra charge.

Hotels and boarding houses in Florida charge from \$10 per week up to \$25 per day. Our price is \$1 per year, supposed to be payable in advance or at most \$1.50 per year when indefinitely postponed.

We dropped into see a butcher, a grocer and a feed man. Best steak, roast, lamb, ham and veal cutlets retail at 25c per pound; pork and veal chops 20c, eggs (cheap now) 8c, creamery butter 38c, fruits as expensive as at home, poultry light, about 21c per pound. But little feed for live stock is raised in the State. Freight is high. Corn, shelled, sells at \$1.50 per 100 pound, oats \$2.25, timothy hay, best \$30 per ton. Wood sells at \$6 per cord delivered. The proprietors may have thought the writer was a groon contemplating housekeeping.

We interviewed some of the city and county officials.

The city owns its water works, artesian well furnishing the supply. The town will not tolerate saloons. Its peace and property are protected by two policemen. The day man, Chief Marshal, is one-legged, and is kept in office more as an act of charity and good will than an essential for the town's welfare; the night man is deaf. There are few disturbances or drunks.

CITY ATTORNEY.

We did not meet the City Attorney. The LOWD ONCE HAD such a dignitary and his salary was \$150 per year, but now his office has been abolished. We presume the taxpayers will not object. (How does this compare with \$900 paid in Mt. Sterling where the population is about 5,000. We were told that DeLand has 4,000 to 5,000 during the tourist season; but Mt. Sterling has 11 saloons to her shame; while DeLand and Volusia county has no saloon—to her honor. We thank our PRESENT City Council for the partial relief afforded.)

We talked with the City Clerk. He also acts as City Assessor and collector of the City's water rents, which in 1906 were \$3647.21. For these services he receives \$450.

CITY VALUATION.

Last year the City Assessor's book showed a valuation of \$489,911 personality and real estate. The city reserves were: Miscellaneous.... \$10160 07 Water Rents..... 3647 21

Total.....\$13807 28 The town, however, has a bond-

ed debt of \$25,000 for water works, streets, etc.

REVENUES—HOW RECEIVED?

In addition to usual taxation there is an Occupation Tax.

We give some of the items as copied from the by-laws and ordinances of the City: Hotels and boarding houses, \$2.50 to \$5.00, according to capacity; restaurants, \$2.50 to \$5.00; merchants, druggists and meat markets, \$1.50 for stock less than \$1,000; 50c for each extra \$1,000 above \$10,000; billiards and pool tables and alleys, \$2.50 each; sewing machine and life insurance agents, \$5 for each company; fire insurance, \$2.50 for each company; drays and wagons, \$1; livery stables, \$2.50 to \$5; electric companies, \$5; banks, \$10; express company, \$25; street vendors of drugs and medicines, 50c for each day; peddlers, \$15; dentists, lawyers and doctors, \$2.50; every person in any business not otherwise specified, \$1.50. Thus revenues for the city are obtained without the humiliation and degradation which come from licensed saloons. The limit of taxation is \$2, but the valuations of property is 1/3 of its true worth.

The qualified voters in town at last election were 300. Few negroes qualify.

In entire county there were 1500 qualified and about 1000 unqualified voters. No man can vote in any election unless he has paid his poll tax of \$1.

The rate of taxation for State and county is \$2.40. The rate is very high, but this is equalized by a very low valuation. A county officer said that property is usually listed at about 1/3 of its worth. The expense of schools for the colored people is borne by the whites.

STETSON UNIVERSITY.

A conspicuous feature of DeLand life is the educational and social advantages. Through the liberality of Jno. B. Stetson; the hat man and others a fine school has been here for several years. Extensive buildings for chapel, recitation room, scientific hall, dormitories, etc., add charm and worth to the town. The chief endowment fund is \$225,000 preferred stock in the Jno. B. Stetson Co. Mr. Stetson died at his residence near town about 2 years ago. Recently Mrs. Stetson gave \$40,000 for library and Mr. Andrew Carnegie \$40,000 for library building. The present library has 14,000 volumes. The attendance at University is now about 425. We heard the president preach on Sunday afternoon and attended chapel exercises on Monday.

PEOPLE WHOM WE MET.

Wm. Parg and wife of Richmond, Ky.; Tom Arnold (formerly of Richmond, brother of John Arnold, who married Margaret Jones) and wife and his mother, who is a sister of the Willises, of

Clark; Wm. Wilkerson and wife; Sewell Combs, Messrs. Shouse are Goss, all of Lexington. As we three sat in Christian Church on Sunday there was a pleasant mutual surprise when W. A. De Haven, of Mt. Sterling, walked in. He actually blushed. There is no telling where folks will get when away from home. On Monday the writer accompanied the ladies to a C. W. B. M. and he was much pleased to meet Miss Rebecca Withers, of Lexington, who also has a home and ranch in Florida and has for several years been a leader in C. W. B. M. affairs and is president of the organization in Florida. She lives at Osceola. Mrs. Jas. B. McCreary is also here, but we did not meet her. We could not stay for the picnic to Kentuckians on Friday. Automobiles and bicycles are popular.

In these letters we cannot give all the Facts and Observations about the various towns. Our object is not to boom Florida. The finest hotel in this town has 175 rooms and is very attractive on up-to-date, with spacious lawn. There are 100 tall pine trees in a group at corner of the veranda.

Many events in DeLand date from the winter of 1894 and 1895, when the great freeze destroyed the orange and other citrus groves. Men rich at sunset were poor at sunrise next morning. Frosts in later years have added to the discouragement. As we drove to DeLand our sympathies went out to the ranchers when we saw what the freeze during the Christmas holidays (last) had done.

(These lines are written as we sit in the Chattanooga hall at St. Petersburg, Fla., on Thursday afternoon, March 7, and we stopped to hear Richmond Pearson, Hobson, the hero of the Merrimack, deliver his great lecture on "America's Mighty Mission.")

At DeLand are spring flowers, mocking birds, people sitting in the yards, women and children bareheaded (if they choose) on bicycles, fresh vegetables coming into market, etc., etc. Good-bye, next stop will be at Orlando, enroute to St. Petersburg.

The man who pities himself always is pitiable.

We handle both wood and steel beam.

FACTS AND OBSERVATIONS

Pineapple Industry, Fishing, Boat Riding, The Everglades, Negro Vote, Saloon License, Tourists.

(Continued From Last Week.)

WEST PALM BEACH.

Here we for the first time saw a coconut tree with ripe nuts. The bearing trees are from 20 feet up; the leaves are at top and the nuts grow in bunches. The town has wide streets, smooth and hard, affording fine facilities for bicycles and automobiles. The business houses and hotels are modern and attractive. The business and life of the town are dependent upon tourists. Territory for expansion is large. Mocking birds and black birds are the songsters. We were surprised to see so many buzzards. At one time we counted 20 on the roof of the great hotel Royal Poinciana. Pelicans and wild ducks were in the bay. No one is allowed to shoot the ducks, hence they are very gentle. At all times they could be seen near the ferry and piers.

We saw but little of the island. Pleasure trips in gasoline and launch launches afford diversion. The bay extends 17 miles or more north of the hotel.

For seven weeks the ladies had pleasant quarters at "the Virginia" in West Palm Beach, kept by Mrs. A. L. Haugh, a genial Pennsylvania lady. Here we met many agreeable guests from a dozen different States.

TRIP TO MIAMI.

Miami is 66 miles south of West Palm Beach. We there spent Wednesday, February 27, there the guests of J. G. Trimble. Miss Ella Trimble was also with us. She boards at Blue Naviets on Biscayne Bay with Mrs. Merritt, who is Miss Sallie Richardson, formerly of Mt. Sterling. Mr. Merritt is County Clerk. His home is two miles from Miami. The Royal Palm is the chief hotel. While it is one of the flingier group. While not so large as the Royal Poinciana it is on a grand style. The town is 10 years old and has about 6,000 people. The hotels Royal Palm and Haydon Hall are white. The Seelbach is to Louisville. The Haydon is built of white stone. The town is strictly modern and is forging to the front. Large, fine business houses and wide streets are the rule. It is and will continue to be a commercial center. Steamship lines go to Bahama Islands, Cuba, etc. Miami is the county seat of Dade county. The length of the county is about 150 miles. The width, if we remember correctly is about 40 miles, but with exception of a strip ranging from 1 to 5 miles wide along the coast, the everglades render this territory practically worthless. The population of Dade county is about 12,000. Outside of Palm Beach, West Palm Beach and Miami, all in Dade county, the population and business is practically nothing, except in isolated patches. This is the appearance from the railroad. On the train we talked with a man who referred to one settlement embracing 200 acres, in which the chief industry is the raising of tomatoes. He said the crop has been engaged for future delivery at \$2 per crate, and that an acre will produce about 200 crates. On this trip we saw several patches of pineapples. Later we will describe this industry.

Miami is headquarters for extensive fisheries. We saw 8 sharks swinging to masts of the vessel, caught a few hours before. We met one of the tourists who caught them. He said the largest shark was 11 feet long and weighed about 200 lbs. Here we met W. J. Thomas and wife, of Shelbyville, Ky.; Mrs. T.

X. Arnold and daughter, Mrs. Harry Green, of Frankfort. Father Trimble owns 3 lots on same street and within one block of the great hotel Royal Palm. He can sell at an advance of 60 per cent. He bought 2 years ago.

MIAMI RIVER.

This river is 5 miles long. It flows from the Everglades into Biscayne Bay, past the Royal Palm. Excursion boats make the trip twice daily. The stream is from 8 to 15 feet deep and from 250 to 400 feet wide muddy of the way. It is a fine body of water. Three musicians added to the pleasure of the trip. Fine fish are in the river. Within a few yards of the head of the river where our boat stopped the stream is, we presume, 50 to 55 feet wide. En route several tributaries or ditches from the Everglades increase the size of the river. Much of the banks are a net work of a species of banyan tree, the limbs of which send down many smaller limbs which take root and these in turn send out other limbs, etc. En route we stopped at a ten acre ranch where oranges and grape fruit abound. Most of these trees grow in holes blasted in the porous rock which is found near Miami. This ground can not be plowed because of the solid or scraggy rock. Much fertilizer is an essential. The fruit is profitable. At the head of navigation is an observatory overlooking the Everglades. This marsh land is fully 200 miles in length and extends west over most of the State. Here and there are small islands or grass and rushes as far as the eye could penetrate. Commercially this vast domain is worthless. Whether or not the skill of man will bring it into use remains to be seen. There is talk of a vast drainage system. Through the centuries there has not doubt been a gradual elevation from the gulf and its reclamation will be attributed to this process, rather than to the engineering skill of man. Between the Everglades and the Atlantic Ocean is a strip of woodland of pines and palms, with interspersed jungle or live oak and long grey moss festooning.

The tourist, who for the first time visits Florida, will be amazed to see the vast regions of sand, pine forest, jungle, sterility, desolation or prairie of coarse grass. Thousands and thousands of acres are now wholly worthless, other thousands are susceptible of culture for pineapples—especially south of center of State, covering the strip for more than 200 miles and especially on what is called Indian River. You have heard of the noted oranges and pineapples of the Indian River section. We presume that many thousands and hundreds of thousands of people are as ignorant about Indian River as was the writer. Indian River is not a river at all. It is an inlet from or arm of the Atlantic, salt water connected at north and south with the Atlantic but separated on the east by a narrow strip of land, containing in places forestry, with now and then an opening to the sea. The rise and fall of ocean tide reaches far up or down this "river," which varies in width up to 15 miles (so we were told). Much of the pineapple section is on Southern Indian River and beyond, towards West Palm Beach.

PINEAPPLES.

Here pineapple farms or fields are similar to Burley Tobacco Co., or wheat fields in Central Kentucky. A pineapple plant is much like the "needle and thread" known to our people, only the leaves are thick and leavy. These plants are usually set 20 by 22 inches and sell at about \$6 per thousand. They yield first crop when 18 months old and with good care produce well for 5 or 6 years. When full grown they nearly cover the ground by leaves lapping. Heavy fertilizing is required every year at an expense approximating \$65 per acre. We saw hundreds and hundreds of acres of "pines" as they are called. Each stalk produces only one apple at a time. We saw in the same field plants in bloom and plants with young apples as large as a pint cup. The crop ripens in June, yet apples can be brought to perfection later and earlier. As the train stopped we bought a fine fresh apple for 15 cents. We saw field after field of pineapples enclosed and covered by a lattice of wood, much like the covering occasionally used in an experimental tobacco patch or around a chicken coop. These ranches are side by side the apparently worthless sandy, piney land in the belt where pineapples can be grown. (Not all this Florida dry land is adapted to pineapples or oranges.) This wild land can be bought and cleared at about \$75 per acre usually, but clearing some of it is much more expensive. If the season is favorable and the market fair the returns from a crop range from \$300 to \$450 per acre. The above information about pineapples and Indian River was gotten from men on train and at stations in this territory.

We have not seen a corn or wheat or grass field (excepting a little of wild grass) in a run of about 400 miles through Florida north and south. "Not grass enough to summer a goose" has its fulfillment in Florida. We have not seen a goose or sheep, seldom even a razor back hog, only a few scrub cattle. There may be many fine cows; we have seen one Jersey cow in the country.

SALOONS.

At Clerk's office in Miami we were informed that the licenses for a saloon amount to about \$1250 each, and that a strong sentiment is growing against saloons. Only 8 counties in the State tolerate them.

NEGRO VOTE.

In Florida the negro vote is practically eliminated. This is done by the law which imposes a poll tax of \$1 which must be paid before a man, white or black, is permitted to vote. Few negroes will pay it. Democrats control in Florida. Occasionally in a hot contest among themselves they use some negroes and whites by the payment of these poll taxes.

A BARBER.

At West Palm Beach we had a hair cut. The barber asked: "Would you like to have your hair singed to prevent it bleeding? We do not. Will you have a tonic? No, I thank you—only a little bay-rum. We handed him a quarter. He presented a ticket for 35c, saying the bay-rum was 10c extra. We paid it. The boy brushed our hair. As we left the proprietor surprised us by saying: "Are you not going to pay the boy for brushing your hair? That's all the he gets." We let him know that we were not accustomed to such and declined to pay. We presume every tourist is "held up" in the same fashion. The writer is rather green, but will know a thing or two before his next tour of Florida. We don't object to paying what is right, but will kick if "held up." We did not ask the proprietor what he charges for dusting a hat or what part the boy gets.

ITINERARY IN FLORIDA.

Saturday, February 23 — En-

route to, at and from Jacksonville. Sunday—At St. Augustine, night enroute to West Palm Beach. Monday and Tuesday—At West Palm Beach, etc.

Wednesday—Trip to Miami.

Thursday—Farewell at West Palm Beach and Palm Beach.

Friday—Enroute from West Palm Beach along Indian River to DeLand, 175 north and 34 miles west.

DELAND.

We arrived here on Friday at 5 p. m. after a 6-mile back drive from Orange City, and will leave here today (Tuesday) March 5, for Orlando, St. Petersburg, Clear Water, etc.

DeLand is the county seat of Volusia county. The county is about 30 by 60 miles. The population of the town is, in summer, 2,000, in winter, a variable number, for the visitors in Florida towns sometimes exceed the resident population.

How shall a visitor put in the time? This is a question which our readers may ask. Some out, sleep and play cards; some out, sleep and play society; some out, sleep and see sights in silent admiration, others are disposed to give a few pointers on Florida, its attractions, customs, resources, institutions, etc. We presume the readers will have some interest in our Facts and Observations. The bill of fare at the great hotels is extensive. Guests are not expected to take all on the list and call for more. All fools do not agree with all guests. So with our observations, take what you like, without extra charge.

Hotels and boarding houses in Florida charge from \$10 per week up to \$25 per day. Our price is \$1 per year, supposed to be payable in advance or at most \$1.50 per year when indefinitely postponed.

We dropped in to see a butcher, a grocer and a feed man. Best steak, roast, lamb, ham and veal cutlets retail at 25c per pound; pork and veal chops 20c, eggs (cheap now) 30c, creamery butter 38c, fruits as expensive as at home, poultry high, meat 24c per pound. But little feed for live stock is raised in the State. Freight is high. Corn, shelled, sells at \$1.50 per 100 pound, oats \$2.25, timothy hay, best \$30 per ton. Wood sells at \$6 per cord delivered. The proprietors may have thought the writer was a groom contemplating housekeeping.

We interviewed some of the city and county officials.

The city owns its water works, artesian well furnishing the supply.

The town will not tolerate saloons. Its peace and property are protected by two policemen. The day man, Chief Marshal, is one-legged, and is kept in office more as an act of charity and good will than an essential for the town's welfare; the night man is deaf. There are few disturbances or drunks.

CITY ATTORNEY.

We did not meet the City Attorney. The town once had such a dignitary and his salary was \$150 per year, but now his office has been abolished. We presume the taxpayers will not object. (How does this compare with \$900 paid in Mt. Sterling where the population is about 5,000. We were told that DeLand has 4,000 to 5,000 during the tourist season; but Mt. Sterling has 11 saloons to her shame; while DeLand and Volusia county has no saloons—to her honor. We thank our present City Council for the partial relief afforded.)

We talked with the City Clerk. He also acts as City Assessor and collector of the City's water rents, which in 1906 were \$3647.21. For these services he receives \$450.

CITY VALUATION.

Last year the City Assessor's book showed a valuation of \$489,911 personality and real estate. The city reserves were: Miscellaneous..... \$10160 07 Water Rents..... 3647 21 Total..... \$13807 28 The town, however, has a bond-

ed debt of \$25,000 for water works, streets, etc.

REVENUES—HOW RECEIVED?

In addition to usual taxation there is an Occupation Tax.

We give some of the items as copied from the by-laws and ordinances of the City: Hotels and boarding houses, \$2.50 to \$50.00, according to capacity; restaurants, \$2.50 to \$5.00; merchants, druggists and meat markets, \$1.50 for stock less than \$1,000; \$1 for each extra \$1,000 to \$10,000; 50c for each extra \$10,000 above \$10,000; billiards and pool tables and alleys, \$2.50 each; sewing machine and life insurance agents, \$5 for each company; fire insurance, \$2.50 for each company; drays and wagons, \$1; livery stables, \$2.50 to \$5; electric companies, \$5; banks, \$10; express company, \$25; street vendors of drugs and medicines, \$50 for each day; peddlers, \$15c; dentists, lawyers and doctors, \$2.50; every person in any business, not otherwise specified, \$1.50. Thus revenues for the city are obtained without the humiliation and degradation which come from licensed saloons. The limit of taxation is \$2, but the valuations of property is 4 of its true worth.

The qualified voters in town at last election were 300. Few negroes qualify.

In entire county there were 1500 qualified and about 1000 unqualified voters. No man can vote in any election unless he has paid his poll tax of \$1.

The rate of taxation for State and county is \$2.40. The rate is very high, but this is equalized by a very low valuation. A county officer said that property is usually listed at about 1 of its worth.

The expense of schools for the colored people is borne by the whites.

STETSON UNIVERSITY.

A conspicuous feature of DeLand life is the educational and social advantages. Through the liberality of Jno. B. Stetson, the hat man and others a fine school has been here for several years. Extensive buildings for chapel, recitation room, scientific hall, dormitories, etc., add charm and worth to the town. The chief endowment fund is \$225,000 preferred stock in the Jno. B. Stetson Co. Mr. Stetson died at his residence near town about 2 years ago. Recently Mrs. Stetson gave \$40,000 for library and Mr. Andrew Carnegie \$40,000 for library building. The present library has 14,000 volumes. The attendance at University is now about 425. We heard the president preach on Sunday afternoon and attended chapel exercises on Monday.

PEOPLE WHOM WE MET.

Wm. Pigg and wife, of Richmond, Ky.; Tom Arnold (formerly of Richmond, brother of John Arnold, who married Margaret Jones) and wife and his mother, who is a sister of the Willises, of

Clark; Wm. Wilkerson and wife; Sewell Combs, Messrs. Shouse and Goss, all of Lexington. As we were sitting in Christian Church on Sunday there was a pleasant musical surprise when W. A. DeHaven, of Mt. Sterling, walked in. He actually blushed. There is no telling where folks will go when away from home. On Monday the writer accompanied the ladies to a C. W. B. M. and he was much pleased to meet Miss Rebecca Withers, of Lexington, who also has a home and ranch in Florida and has for several years been a leader in C. W. B. M. affairs and is president of the organization in Florida. She lives at Ocoee. Mrs. Jas. B. McCreary is also here, but we did not meet her. We could not stay for the picnic to Kentuckians on Monday. Automobiles and bicycles are popular.

In these letters we cannot give all the Facts and Observations about the various towns. Our object is not to boom Florida. The finest hotel in this town has 175 rooms and is very attractive and up-to-date, with spacious lawn. There are 100 tall pine trees in a group at one corner of the veranda.

Many events in DeLand date from the winter of 1894 and 1895, when the great freeze destroyed the orange and other citrus groves. Men rich at sunset were poor at sunrise next morning. Frosts in later years have added to this encouragement. As we drove to DeLand our sympathies went out to the ranchers when we saw what the freeze during the Christmas holidays (last) had done.

[These lines are written as we sit in the Chautauqua hall at St. Petersburg, Fla., on Thursday afternoon, March 7, and we stopped to hear Richard Pearson Hobson, the hero of the Merrimack, deliver his great lecture on "America's Mighty Mission."]

At DeLand are spring fountains, mocking birds, people sitting in the yards, women and children bareheaded (if they choose) on bicycles, fresh vegetables coming into market, etc., etc. Good-bye, next stop will be at Orlando, enroute to St. Petersburg.

The man who pities himself always is pitiable.

THE SICK

Mrs. Garfield Perkins continues quite sick with grip.

The condition of James Horton remains about the same.

Mrs. J. M. Rainey, who has been seriously ill, is very much improved.

Mrs. J. M. Bigstaff, who has been quite sick with grip, is very much improved.

Archie Roosevelt, who has been very sick with diphtheria, is very much improved.

Mrs. Clarence White continues quite ill at her home in the country. Slight improvement Tuesday.

Miss Douglas Julian, daughter of T. G. Julian, has been operated on for appendicitis and is doing well.

Mrs. Harry Purdy has returned to Norton's Infirmary, Louisville, for special treatment. Her condition is not so favorable.

Mr. C. N. Ciscoe, of Hazel Green, who is employed at the Old McBrayer Distillery Company, is quite sick with pneumonia.

Isn't it strange that a man will get up by day light and work like a slave all day to make from \$1 to \$2 and then recklessly waste one third of this hard-earned money by dealing at the wrong place? Go to Roth Bros. Cash Grocery and "keep the difference."

Price, 25c per box.

Leon Woven Wire Fence, 26, 30 and 48 inches high, costs less at C. T. Flanders, R. F. D. 3, 30-41 Mt. Sterling, Ky.

The Great Emerald Chief Dead.

Emerald Chief, a model of beauty and form, intelligent as a nun, of rare breeding, the result of a life of study and observation died on Saturday afternoon at the age of six years, in the pasture of his owner, J. Gano Johnson, from heart disease. An hour before his death he was seen in apparent good health and when found was prostrate on the bluegrass pasture in the struggle with death. This horse was a world winner at the World's Fair at St. Louis, where his owner refused for him \$15,000. He was held at \$30,000. By the death of this horse the owner is not the only loser, for his breeding imprint was being made on the highly favored horses of the blue grass section.

In the death of Emerald Chief should come to the owners of all fine stock an object lesson: "Keep your horses well insured." Mr. Johnson did not carry a dollar of insurance on this valuable horse.
